

# USB 2.0 > DVI – HDMI Adapter

## Description

The USB 2.0 to DVI Adapter enables you to connect any monitor, LCD, projector to your PC or notebook with the system requirement as below, without need of a second graphics card. By using the included adapter DVI to HDMI, you can also connect HDMI monitors.

Thus you can mirror and extend your display and work with several monitors simultaneously. You can connect up to 6 monitors on one PC depending on the supported system. One adapter is required for each monitor. We indicate that this adapter is suitable for simple applications hence it does not replace a complete graphics card.
