

## Delock USB 2.0 Switch 2 PC to 1 device

### **Description**

This USB switch by Delock allows to share a single USB 2.0 peripheral device with two different computer systems. This avoids the cost of purchasing multiple peripherals or the hassle of swapping cables from one system to another.

### **Memory function**

Port selection works via a button, regardless if one of the computer systems is disconnected. The last setting is saved, even if the unit is shut down and restarted.

#### Secure mounting

A built-in magnet allows the switch to be attached to suitable metal surfaces; alternatively, the case has an option for wall mounting with screws.

#### Item no. 11491

EAN: 4043619114917 Country of origin: Taiwan, Republic of China

Package: Retail Box

### **Technical details**

· Connectors:

Input:

2 x USB 2.0 Type-B female

Output:

1 x USB 2.0 Type-A female

- 1 x button with LED indicator for PC 1 or PC 2
- USB Bus powered (no additional power supply required)
