

Delock Tablet and Laptop Stand with integrated Docking Station 4K - HDMI / DisplayPort / LAN / Hub / HDR / PD

Description

This **stand** for tablets and laptops **with docking station** by Delock convinces not only with its design, but also with stability and function. Thanks to the adjustable angle, the tablet or laptop can be brought into any possible position and stands stable. The rubber pads attached to the bottom and in the holder ensure that neither the device nor the holder slips.

Ideal even for longer video calls or series marathons

Thanks to the recess in the holder, the tablet can also be charged while it is upright. This makes the holder ideal for long Facetime or Skype video calls as well as for a series marathon.

Docking station

The docking station can be connected to a mobile device with **USB-C™ DP Alt Mode or Thunderbolt™ 3 port** and provides a variety of interfaces. Up to two monitors can be operated simultaneously on the **DisplayPort** and **HDMI** output. Integrated USB ports allow the use of peripherals, and ports for a **headset** and **Gigabit** network complete the equipment.

USB Power Delivery (USB PD 3.0) support up to 85 watt

The docking station has a **USB Type-C™ Power Delivery port**. If this port is connected to the power supply of the laptop or tablet, the host device is charged with up to 85 watts during operation.

Supports HDR

By the support of the HDR (High Dynamic Range) function, the screen can be displayed sharper, clearer and more vivid.
